A BIOCHEMICAL SOCIETY SCIENTIFIC MEETING

# Drug Repurposing

18-19 November 2019

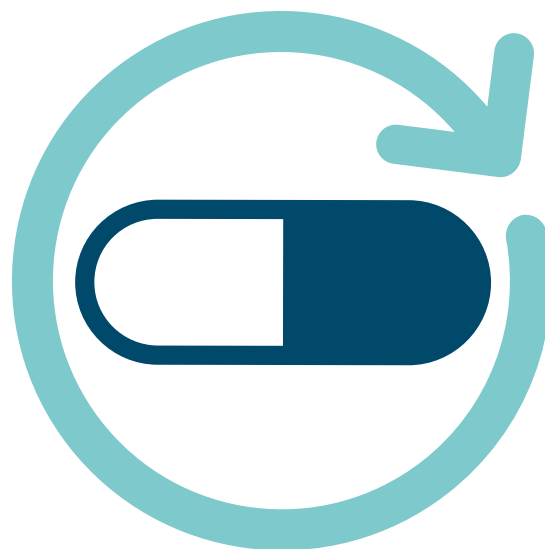

IET Birmingham: Austin Court,  
Birmingham, UK

Drug repurposing represents a promising approach to find new therapeutic uses for existing drugs. There is a need for more systematic and strategic approaches and resources, and this two-day meeting will provide a platform to highlight some of the latest developments in the field of drug repurposing and showcase such efforts besides recent drug repurposing studies.

The field of drug repurposing provides a natural opportunity to combine the strengths of academia and industry. Scientists from both sectors, as well as clinicians, are encouraged to attend this meeting for interdisciplinary discussion and networking.
