A BIOCHEMICAL SOCIETY TRAINING EVENT

# Key aspects of modern drug discovery

**17-18 October 2019**  
**BioCity, Nottingham, UK**

Designed and delivered by experts from industry and academia, this training event will provide a comprehensive overview of the pre-clinical drug discovery process, together with case studies, group discussions and networking opportunities.

The workshop will focus on small molecule target identification and validation, hit-to-lead and lead optimisation, as well as on pre-clinical drug development and toxicology.

## Programme Coordinators:

- Rick Davies, AstraZeneca
- Jacqui Piner, GSK
- John Unitt, Sygnature Discovery
- Heather Wallace, University of Aberdeen
- John Ladbury, University of Leeds
- John Colyer, University of Leeds
