

# BIOCHEMICAL JOURNAL

## MOLECULAR MECHANISMS IN BIOLOGY

[portlandpress.com/biochemj](http://portlandpress.com/biochemj)

For over 100 years, the *Biochemical Journal* has been at the forefront of biomedical advancement, breaking new ground in the fields of biochemistry, cellular biosciences, and molecular biology. The *Biochemical Journal* publishes research that goes beyond observational work, articulating new insights and deepening the wider community's understanding of biological processes.

## Chair of Editorial Board

**David Carling** (MRC London Institute of Medical Sciences, Imperial College, London, UK)

## Associate Editors

**Dario Alessi** (University of Dundee, UK)

**Sarah M. Assmann** (Pennsylvania State University, USA)

**Jonathan Backer** (Albert Einstein College of Medicine, USA)

**Ben Black** (University of Pennsylvania, USA)

**Michael Duchen** (University College London, UK)

**Christine Foyer** (University of Birmingham, UK)

**Tatiana Kutateladze** (University of Colorado School of Medicine, USA)

**Mark Lemmon** (Yale University School of Medicine, USA)

**Sheng-cai Lin** (Xiamen University, China)

**James Murphy** (Walter and Eliza Hall Institute of Medical Research, Australia)

**Hayley Newton** (University of Melbourne, The Peter Doherty Institute for Infection and Immunity, Australia)

**Anabella Srebrow** (University of Buenos Aires, Argentina)

**Gregory Steinberg** (McMaster University, Canada)

**Cathy Tournier** (University of Manchester, UK)

**Bart Vanhaesebroeck** (University College London Cancer Institute, UK)

**Ming-Wei Wang** (Chinese Academy of Sciences/Shanghai Medical College, Fudan University, China)

**Tao Xu** (Institute of Biophysics, Chinese Academy of Sciences, China)

**Chiara Zurzolo** (Institut Pasteur, France)

## Articles

### **Development of phospho-specific Rab protein antibodies to monitor *in vivo* activity of the LRRK2 Parkinson's disease kinase**

*Pawel Lis, Sophie Burel, Martin Steger, Matthias Mann, Fiona Brown, Federico Diez, Francesca Tonelli, Janice L. Holton, Philip Winglok Ho, Shu-Leong Ho, Meng-Yun Chou, Nicole K. Polinski, Terina N. Martinez, Paul Davies and Dario R. Alessi*

### **Cilium structure, assembly, and disassembly regulated by the cytoskeleton**

*Mary Mirvis, Tim Stearns and W. James Nelson*

### **RhoBTB1 interacts with ROCKs and inhibits invasion**

*Raquel B. Haga, Ritu Garg, Francesca Collu, Bárbara Borda D'Água, Sofia T. Menéndez, Audrey Colomba, Franca Fraternali and Anne J. Ridley*

### **MPC1 is essential for PGC-1 $\alpha$ -induced mitochondrial respiration and biogenesis**

*Eunjin Koh, Young Kyung Kim, Daye Shin and Kyung-Sup Kim*

### **Hsp70 molecular chaperones: multifunctional allosteric holding and unfolding machines**

*Eugenia M. Clerico, Wenli Meng, Alexandra Pozhidaeva, Karishma Bhasne, Constantine Petridis and Lila M. Gierasch*

As the Biochemical Society's publisher, we work in partnership with researchers, institutions, and funders to share knowledge and advance the molecular biosciences.

Publishing world-leading research and reviews across our portfolio of seven journals, we return all of our profits to the life science community in support of our Society's charitable activities. With more than six million worldwide article views in 2019, our journals cover the depth and breadth of the molecular biosciences, from observational work to interpreting mechanisms, from translating basic research into medical insights to foundational overviews of new and emerging topics.

**BIOCHEMICAL  
SOCIETY**

(Registered Charity No 253894)

Founded in 1911, the Biochemical Society exists to advance molecular bioscience, promoting its importance as an academic discipline, from grassroots level to government policy, and highlighting its role in positively effecting societal challenges. Offering an extensive programme of scientific meetings, training events and courses, educational resources and activities, policy and public engagement, the Society provides support for researchers and scientists, teachers, and members of the public.

### Cover Image

The crystal structure of *Escherichia coli* acetohydroxyacid synthase (AHAS) I holoenzyme, revealing the association between the regulatory subunit (RSU) and catalytic subunit (CSU) in an A<sub>2</sub>B<sub>2</sub> mode. RSU accelerates the open rate of the activation loop of CSU and thus activates the CSU. Image kindly provided by Yuequan Shen (Nankai University).
