BIOCHEMICAL JOURNAL

For over 100 years, the *Biochemical Journal* has been at the forefront of biochemical advancement, breaking new ground in the fields of biochemistry, cellular biosciences, and molecular biology. The *Biochemical Journal* publishes research that goes beyond observational work, articulating new insights and deepening the wider community's understanding of biological processes.

CLINICAL SCIENCE

Translating molecular bioscience and experimental research into medical insights, papers published in *Clinical Science* cover a range of topics, including the cardiovascular system and vascular biology, genomic medicine, inflammation, nephrology, hepatology, and the respiratory system.

BIOSCIENCE REPORTS

Providing a platform for valid findings and data, *Bioscience Reports* is a fully open access journal publishing sound scientific research in all areas of cell biology and the molecular life sciences. Assessed on soundness alone, accepted papers are indexed in DOAJ and published under the liberal CC BY license.

NEURONAL SIGNALING

Publishing high-quality molecular and cellular neuroscience research, *Neuronal Signaling* provides the ideal open access platform for a variety of neuroscientific disciplines, including basic signaling interests (such as neurotransmitters and receptors) and signaling aspects of pathologies.

BIOCHEMICAL SOCIETY TRANSACTIONS

Providing a timely snapshot of the latest developments, *Biochemical Society Transactions* is a fully commissioned journal publishing concise reviews from across all areas of the molecular and cellular biosciences.

ESSAYS IN BIOCHEMISTRY

Highlighting key contemporary topics in biochemistry, *Essays in Biochemistry* is a fully commissioned journal that brings together reviews from leading experts. From antimicrobial resistance to the biological mechanisms of ageing, themed issues are guest edited by key opinion leaders, offering up-to-date summaries of changing specialist research areas.

EMERGING TOPICS IN LIFE SCIENCES

Reflecting the interdisciplinary nature of life science research, *Emerging Topics in Life Sciences* is a fully commissioned journal jointly owned by the Royal Society of Biology and the Biochemical Society. Guest edited by leading experts, themed issues focus on new or growing key topics, keeping readers up-to-date with all of the latest advances from across the life sciences.

The Biochemist

The official magazine of the Biochemical Society, *The Biochemist* is an essential read for anyone interested in the fundamental processes of molecular biology, health and disease. Published bi-monthly, themed issues keep readers up-to-date with news and views of relevance to the molecular bioscience community.

Science Editor: Chris Willmott

MEETINGS AND TRAINING

From scientific meetings to training events and courses, the Biochemical Society brings together leading molecular bioscientists in academia and industry.

EDUCATION

The Biochemical Society facilitates opportunities for teachers, school students, and undergraduates to spend time in academia and industry.

biochemistry.org/education

PUBLIC ENGAGEMENT

The Biochemical Society helps students and researchers communicate their work to policy makers and the general public, promoting wider engagement with social and ethical issues relating to the biosciences.

PORTLAND PRESS

As the Biochemical Society's publisher, we work in partnership with researchers, institutions, and funders to share knowledge and advance the molecular biosciences.

Publishing world-leading research and reviews across our portfolio of seven journals, we return all of our profits to the life science community in support of our Society's charitable activities. With more than six million worldwide article views in 2019, our journals cover the depth and breadth of the molecular biosciences, from observational work to interpreting mechanisms, from translating basic research into medical insights to foundational overviews of new and emerging topics.
