As the Biochemical Society’s publisher, we work in partnership with researchers, institutions, and funders to share knowledge and advance the molecular biosciences.

Publishing world-leading research and reviews across our portfolio of seven journals, we return all of our profits to the life science community in support of our Society’s charitable activities. With more than six million worldwide views in 2019, our journals cover the depth and breadth of the molecular biosciences, from observational work to interpreting mechanisms, from translating basic research into medical insights to foundational overviews of new and emerging topics.

Cover Image
Kinetochores are specialized protein structures assembled on the centromere of the chromosome during mitotic and meiotic cell division. The cover image shows a mouse oocyte in metaphase I. The image was kindly provided by Dr Soni Lacefield.

Postgrad Press
(Registered Charity No 253894)

Founded in 1911, the Biochemical Society exists to advance molecular bioscience, promoting its importance as an academic discipline, from grassroots level to government policy, and highlighting its role in positively effecting societal challenges.

Offering an extensive programme of scientific meetings, training events and courses, educational resources and activities, policy and public engagement, the Society provides support for researchers and scientists, teachers, and members of the public.
