

BIOCHEMICAL SOCIETY TRANSACTIONS

THE REVIEWS JOURNAL OF THE BIOCHEMICAL SOCIETY

portlandpress.com/biochemsoctrans

Providing a timely snapshot of the latest developments, *Biochemical Society Transactions* is a fully commissioned journal publishing mini-reviews from across all areas of the molecular and cellular biosciences.

Editor-in-Chief

Colin Bingle (University of Sheffield, Sheffield, UK)

Associate Editors

Marnie Blewitt (Walter and Eliza Hall Institute of Medical Research, Parkville, Australia) Alexandre Bruni-Cardoso (Universidade de São Paulo, São Paulo, Brazil) Jiamu Du (Southern University of Science and Technology, China) David Fell (Oxford Brookes University, Oxford, UK) Clare Hawkins (University of Copenhagen, Copenhagen, Denmark) Sang Yup Lee (Korea Advanced Institute of Science and Technology, Daejeon, South Korea) James Murphy (Walter and Eliza Hall Institute of Medical Research, Parkville, Australia) Ivan Robert Nabi (University of British Columbia, Vancouver, Canada)
Johann M. Rohwer (Stellenbosch University, Stellenbosch, South Africa)
Stefanie Rosa (Linnean Centre for Plant Biology, Uppsala, Sweden)
Jeanne Salje (University of Oxford, Oxford, UK)
Helen Walden (University of Glasgow, Glasgow, UK)
Michael Williamson (University of Sheffield, Sheffield, UK)

Articles

Learning RuBisCO's birth and subsequent environmental adaptation Hiroki Ashida, Eiichi Mizohata and Akiho Yokota

Initiating DNA replication: a matter of prime importance Stephen D. Bell

Breast tumour organoids: promising models for the genomic and functional characterisation of breast cancer Charlotte Roelofs, Frédéric Hollande, Richard Redvers, Robin L. Anderson and Delphine Merino

Cryo-EM in drug discovery Tom Ceska, Chun-Wa Chung, Rob Cooke, Chris Phillips and Pamela A. Williams

The contribution of intrinsically disordered regions to protein function, cellular complexity, and human disease
M. Madan Babu

'2020 Journal Impact Factor, Journal Citation Reports (Web of Science Group, 2021)

As the Biochemical Society's publisher, we work in partnership with researchers, institutions, and funders to share knowledge and advance the molecular biosciences.

Publishing world-leading research and reviews across our portfolio of seven journals, we return all of our profits to the life science community in support of our Society's charitable activities. With more than four million worldwide views in 2020, our journals cover the depth and breadth of the molecular biosciences, from observational work to interpreting mechanisms, from translating basic research into medical insights to foundational overviews of new and emerging topics.

(Registered Charity No 253894)

Founded in 1911, the Biochemical Society exists to advance molecular bioscience, promoting its importance as an academic discipline, from grassroots level to government policy, and highlighting its role in positively effecting societal challenges.

Offering an extensive programme of scientific meetings, training events and courses, educational resources and activities, policy and public engagement, the Society provides support for researchers and scientists, teachers, and members of the public.

Cover Image

The cover shows a metaphorical representation of the anti-CRISPR AcrIIA6, represented as handcuffs, sequestering two Streptococcus thermophilus CRISPRI-Cas9 (St1Cas9) molecules at a time and preventing conformational changes associated with DNA recognition and binding. In the absence of AcrIIA6, St1Cas9 tightly binds to its target DNA, and can proceed to target cleavage. This cover artwork has been made by Beata Edyta Mierzwa (www.BeataScienceArt.com).
