ESSAYS IN BIOCHEMISTRY

Highlighting key contemporary topics in biochemistry, *Essays in Biochemistry* is a fully commissioned journal that brings together reviews from leading experts. From antimicrobial resistance to the biological mechanisms of ageing, themed issues are guest edited by key opinion leaders, offering up-to-date summaries of changing specialist research areas.

Editor-in-Chief

Sarah Perrett (Institute of Biophysics, Chinese Academy of Sciences, China)

Editorial Advisory Panel

Paul Brookes (University of Rochester Medical Center, USA)

Serena Carra (University of Modena and Reggio Emilia, Modena and Reggio Emilia, Italy)

Steve Gutteridge (FMC Corporation, USA)

Lorna Harries (University of Exeter College of Medicine and Health, UK)

Samrat Mukhopadhyay (Indian Institute of Science Education and Research, India)

Hannah Scott (Cardiff University, UK)

Elizabeth Shephard (University College London, UK)

Cathy Tournier (University of Manchester, UK)

Zhe Wu (Southern University of Science and Technology, China)

Y. Shrike Zhang (Harvard Medical School/Brigham and Women's Hospital, USA)

VIA OUR HOMEPAGE

As the Biochemical Society's publisher, we work in partnership with researchers, institutions, and funders to share knowledge and advance the molecular biosciences.

Publishing world-leading research and reviews across our portfolio of seven journals, we return all of our profits to the life science community in support of our Society's charitable activities. With more than four million worldwide views in 2020, our journals cover the depth and breadth of the molecular biosciences, from observational work to interpreting mechanisms, from translating basic research into medical insights to foundational overviews of new and emerging topics.

**BIOCHEMICAL
SOCIETY**

(Registered Charity No 253894)

Founded in 1911, the Biochemical Society exists to advance molecular bioscience, promoting its importance as an academic discipline, from grassroots level to government policy, and highlighting its role in positively effecting societal challenges.

Offering an extensive programme of scientific meetings, training events and courses, educational resources and activities, policy and public engagement, the Society provides support for researchers and scientists, teachers, and members of the public.
