# BIOCHEMICAL JOURNAL

MOLECULAR MECHANISMS IN BIOLOGY

---

[portlandpress.com/biochemj](http://portlandpress.com/biochemj)

For over 100 years, the *Biochemical Journal* has been at the forefront of biomedical advancement, breaking new ground in the fields of biochemistry, cellular biosciences, and molecular biology. Rigorous understanding of molecular mechanisms in biology is at the core of the *Biochemical Journal's* mission. The journal is proud to play a key role in advancing understanding through publication of high-impact research and reviews in 21<sup>st</sup> century biochemistry from across the world, leading the way in an era of rapid change.

**Chair of the Editorial Board | Mark Lemmon** (Yale University School of Medicine, USA)

## Associate Editors

**Dario Alessi** (University of Dundee, UK)

**Jonathan Backer** (Albert Einstein College of Medicine, USA)

**Ben Black** (University of Pennsylvania, USA)

**Clay Clark** (University of Texas at Arlington, USA)

**Michael Duchen** (University College London, UK)

**Patrick Eyers** (University of Liverpool, UK)

**Christine Foyer** (University of Birmingham, UK)

**Tatiana Kutateladze** (University of Colorado School of Medicine, USA)

**Ilse Kranner** (University of Innsbruck, Austria)

**Pilong Li** (Tsinghua University, China)

**James Murphy** (Walter and Eliza Hall Institute of Medical Research, Australia)

**Hayley Newton** (University of Melbourne, Australia)

**Katrin Rittinger** (The Francis Crick Institute, UK)

**Stanislav Y. Shvartsman** (Princeton University, USA)

**Anabella Srebrow** (University of Buenos Aires, Argentina)

**Gregory Steinberg** (McMaster University, Canada)

**Cathy Tournier** (University of Manchester, UK)

**Bart Vanhaesebroeck** (University College London Cancer Institute, UK)

**Ming-Wei Wang** (Chinese Academy of Sciences/ Shanghai Medical College, Fudan University, China)

**Tao Xu** (Institute of Biophysics, Chinese Academy of Sciences, China)

**Chiara Zurzolo** (Institut Pasteur, France)

## Articles

-  [Identifying SARS-CoV-2 antiviral compounds by screening for small molecule inhibitors of nsp13 helicase](#)
-  [Deciphering the LRRK code: LRRK1 and LRRK2 phosphorylate distinct Rab proteins and are regulated by diverse mechanisms](#)
-  [Patient-derived glioblastoma stem cells transfer mitochondria through tunneling nanotubes in tumor organoids](#)
-  [Importance of tyrosine phosphorylation for transmembrane signaling in plants](#)
-  [Systems approaches to investigate the role of NF- \$\kappa\$ B signaling in aging](#)

## Special collections

[Tackling SARS-CoV-2 Biochemistry](#) - Available to read

[Towards Systems Biochemistry](#) - Available to read, full collection coming soon

[Cell death and survival](#) - Open for submissions

[Plants and climate change: the role of plants in achieving net zero](#) - Open for submissions

[21<sup>st</sup> century approaches to studying cell signaling](#) - New collection opening soon for submissions

**POLICY**  
WE ACTIVELY CONTRIBUTE TO  
THE EVOLVING LANDSCAPE  
OF ACADEMIC PUBLISHING

As the Biochemical Society's publisher, we work in partnership with researchers, institutions, and funders to share knowledge and advance the molecular biosciences.

Publishing world-leading research and reviews across our portfolio of seven journals, we return all of our profits to the life science community in support of our Society's charitable activities. With more than four million worldwide article views in 2021, our journals cover the depth and breadth of the molecular biosciences, from observational work to interpreting mechanisms, from translating basic research into medical insights to foundational overviews of new and emerging topics.

**BIOCHEMICAL  
SOCIETY**

(Registered Charity No 253894)

Founded in 1911, the Biochemical Society exists to advance molecular bioscience, promoting its importance as an academic discipline, from grassroots level to government policy, and highlighting its role in positively effecting societal challenges. Offering an extensive programme of scientific meetings, training events and courses, educational resources and activities, policy and public engagement, the Society provides support for researchers and scientists, teachers, and members of the public.

### Cover Image

The cover image shows a fluorescence image of a tumour organoid derived from patient derived GSCs after 23 days of culture, stained for anti- $\alpha$ Tubulin (microtubules, white) and Phalloidin (actin red). The image was captured by Inés Saenz-de-Santa-Maria with an inverted confocal microscope LSM700, Pln-Apo 10X/0.45 objective.
