CLINICAL SCIENCE

LINKING BASIC SCIENCE TO
DISEASE MECHANISMS

portlandpress.com/clinsci

Translating molecular bioscience and experimental research into medical insights, *Clinical Science* offers comprehensive studies using a multi-disciplinary approach including models of human disease and clinical perspectives to advance human health. *Clinical Science* covers the broad spectrum of biomedical specialities including, the cardiovascular system and vascular biology, genomic medicine, inflammation, nephrology, hepatology, cancer biology and the respiratory system.

Editor-in-Chief

Michael J. Ryan (University of South Carolina School of Medicine Columbia, USA)

Associate Editors

Philip Calder (University of Southampton, UK)

Mark Cooper (Monash University, Australia)

Christian Delles (University of Glasgow, UK)

Satoru Eguchi (Lewis Katz School of Medicine at Temple University, USA)

Rayna J. Gonzales (The University of Arizona College of Medicine, USA)

Mansoor Husain (MaRS Centre, Canada)

Karin Jandeleit-Dahm (Monash University, Australia)

Jose Krieger (University of São Paulo, Brazil)

Jonathan Lamb (Imperial College, UK)

Isabelle Leclercq (Universite catholique de Louvain, Belgium)

Maria Luisa S. Sequeira-Lopez (University of Virginia, USA)

Ilja Striz (Institute of Clinical and Experimental Medicine, Czech Republic)

Jennifer Sullivan (Augusta University, USA)

Ross Vlahos (RMIT University, Australia)

Zhiming Zhu (Chongqing Institute of Hypertension, China)

Articles

-  **Experimental data using candesartan and captopril indicate no double-edged sword effect in COVID-19**
-  **Lysophosphatidylcholine induces oxidative stress in human endothelial cells via NOX5 activation – implications in atherosclerosis**
-  **Tumoral PD-1^{hi}CD8⁺ T cells are partially exhausted and predict favorable outcome in triple-negative breast cancer**

VIA OUR HOMEPAGE

As the Biochemical Society's publisher, we work in partnership with researchers, institutions, and funders to share knowledge and advance the molecular biosciences.

Publishing world-leading research and reviews across our portfolio of seven journals, we return all of our profits to the life science community in support of our Society's charitable activities. With more than four million worldwide article views in 2021, our journals cover the depth and breadth of the molecular biosciences, from observational work to interpreting mechanisms, from translating basic research into medical insights to foundational overviews of new and emerging topics.

**BIOCHEMICAL
SOCIETY**

(Registered Charity No 253894)

Founded in 1911, the Biochemical Society exists to advance molecular bioscience, promoting its importance as an academic discipline, from grassroots level to government policy, and highlighting its role in positively effecting societal challenges. Offering an extensive programme of scientific meetings, training events and courses, educational resources and activities, policy and public engagement, the Society provides support for researchers and scientists, teachers, and members of the public.

Cover Image

The cover features a flat-mounted rat retina from Qiu and Ma *et al.* on the possible pathogenic role of human C-reactive protein (hCRP) in diabetic retinopathy. They found that hCRP promotes ischemia-induced retinal neovascularization in a rat model of oxygen-induced retinopathy.
